

Aleksandra Shitina

Data Scientist

Highly motivated data scientist with a background in linguistics looking for a junior position.

PROJECTS

Predicting Hotel Booking Cancellations

(<https://github.com/sashitina/churn-prediction>)

The main idea of this project was to find the best classification model for predicting booking cancellations and evaluate the potential business benefits of the model implementation.

Sklearn, Pandas, Matplotlib, Numpy, Seaborn

Star Temperature Prediction (in process)

(<https://github.com/sashitina/star-temperature-prediction>)

Developing a neural network to predict the surface temperature of a star.

PyTorch, Pandas, Matplotlib, Numpy

EXPERIENCE

Translator

UMEDI

January 2021 - April 2022 - Saint Petersburg
